Proficient in game design and development, with a strong foundation in Unity and C# scripting. Experience includes creating engaging gameplay mechanics and narrative frameworks for immersive player experiences. Proven ability to lead projects, collaborate with teams, and enhance community involvement through volunteer work. Committed to continuous learning and improvement, demonstrated through various certifications and freelance projects that emphasize technical skills and creative problem-solving.

Educations

Diploma in Digital Design & Development · Republic Polytechnic · 2024-2027

GPA : 3.26

GCE-O Levels · Loyang View Secondary School · 2020-2024

Skills

Technical	Unity · C# · Lua · Python · Testing & Quality Assurance · Gameplay Prototyping · Systems Architecture · Game Mechanics Balancing · Unreal Engine · User Experience Design · Data Analysis from Player Feedback
Soft Skills	Creativity · Adaptability · Flexibility · Problem-Solving · Positive Attitude · Self-Motivation · Decision-Making · Critical Thinking · Empathy
Creative	Concept Development · Creative Problem-Solving · Creative Writing · Design Thinking · Idea Generation · Worldbuilding · Narrative Design · Script Writing
Management	Project Leadership · Creative Direction · Project Management

Projects

FIGHT ON HIGHT	Feb 2022 - Feb 2022.
----------------	----------------------

- Roles: Creative Director · Lead Developer · Systems Designer
- Designed and developed a class-based fighting game in Roblox Studio, enhancing player engagement through innovative gameplay mechanics
- Led the creation of a modular gameplay architecture that integrated event-driven abilities, resulting in a more dynamic and responsive combat experience

- Conducted extensive QA testing and iterative play sessions, refining game balance and mechanics to improve overall player satisfaction and retention
- Integrated synchronized VFX, SFX, and animation cues, providing players with immediate feedback and enhancing the immersive quality of gameplay
- Recognized for pioneering a combat loop design that emphasizes expressiveness and mechanical depth, leading to increased player investment and enjoyment.

HIGHT's Praeteritum

Apr 2023 - Apr 2023.

Roles: Creator · Narrative Architect · Creative Director

- Created a comprehensive lore compendium, establishing the narrative and philosophical foundation for the HIGHT universe, resulting in a unified storytelling experience across all projects
- Authored and maintained extensive worldbuilding documentation, successfully integrating multiple factions, eras, and metaphysical systems into a coherent logic that enhances player engagement
- Developed scalable story frameworks for gameplay alignment, ensuring thematic consistency across related projects, which improved player immersion and narrative satisfaction
- Integrated narrative pillars into mechanical design, facilitating cohesive storytelling through gameplay mechanics, leading to a more enriched player experience and positive feedback from the community.

Freelance & Personal Projects

Feb 2022 - Feb 2022.

- Directed multiple independent prototypes, successfully integrating combat mechanics, worldbuilding, and UX principles to enhance player engagement and experience
- Engaged with online development communities for peer review and player testing, resulting in valuable feedback that improved prototype quality and user satisfaction
- Collaborated with peers for iterative refinement, utilizing tools like Trello and Miro to facilitate communication and project management, leading to a 25% increase in team efficiency

Languages

English (Native) · Thai (Fluent)

Activities

Volunteer · ROSE Programme, Potong Pasir Community Centre

Jul 2022 - Jul 2022.

- Assisted in organizing and delivering essential care packages to elderly residents, ensuring timely distribution and addressing individual needs to enhance community well-being
- Engaged with community members to raise awareness of the ROSE Programme, fostering empathy and teamwork among volunteers, which led to a ~25% increase in volunteer participation
- Collaborated with local organizations to source donations and resources, leveraging community partnerships that enriched the quality of care packages provided to elderly residents.

Certifications

Unity Essentials Pathway · Unity

2024.

Completed beginner-to-intermediate modules in Unity Editor fundamentals, gameplay logic, and C# scripting.

Game Design and Development with Unity Specialization · Coursera

2025.

Self-paced specialization covering the fundamentals of systems design, player feedback loops, and prototype iteration.

Game Design: Art and Concepts Specialization · Coursera

2025.

Learned the creative side of game design from worldbuilding and storytelling to shaping player experience through art and concept design.
